

Excess Casualty Insurance for Institutional Construction

Offering higher limits and custom coverage, excess casualty insurance provided by BCS helps safeguard against the substantial liabilities and unforeseen events that characterize the evolving landscape of institutional construction projects.

Why Do You Need Excess Casualty Insurance for Institutional Construction?

Whether you're building a school or a hospital, BCS has the expertise and experience to provide coverage solutions for your institutional projects. For businesses engaged in constructing universities, museums, and courthouse projects, Berkley Construction Solutions excess casualty insurance is a strategic asset that offers:

Comprehensive Protection: Institutional construction projects like hospitals and university research facilities present heightened safety concerns. Our excess casualty

insurance solutions, written on a follow form basis, are designed to provide continuity of coverage.

Higher Limits for Enhanced Protection: The legal environment is volatile, and the financial stakes are high. We offer significant limits — up to \$25 million — ensuring your business is adequately protected against costly, unexpected events.

Dedicated Construction Claims Expertise: Construction claims are big and require expert oversight. That's why we handle our claims in-house rather than via a third-party provider. Our direct-handled approach ensures continuity, clarity and efficiency which are all critical components in managing claims in a volatile and uncertain environment.

Target Institutional Classes

Schools

Universities

Hospitals

Museums
