

Excess Casualty Insurance for Industrial Construction

With higher limits and custom coverage, BCS excess casualty insurance helps safeguard against the substantial liabilities and unforeseen events that characterize the evolving landscape of industrial construction projects.

Why Do You Need Excess Casualty Insurance for Industrial Construction?

Whether you're building a semiconductor fabrication plant or an equipment manufacturing plant, BCS has the expertise and experience to provide coverage solutions for your industrial projects. Our coverage gives you that added layer of protection so that you can confidently navigate around your projects' complex hazards and exposures.

Berkley Construction Solutions excess casualty insurance is a strategic asset that offers you the following advantages:

Comprehensive Protection: Industrial construction projects often involve intricate processes and specialized technology. With technology comes risk. Our excess casualty insurance solutions, written on a follow form basis, are designed to provide continuity of coverage.

Higher Limits for Enhanced Protection: The legal environment is volatile, and the financial stakes are high. We offer significant limits — up to \$25 million — ensuring your business is adequately protected against costly, unexpected events.

Dedicated Construction Claims Expertise: Construction claims are big and require expert oversight. That's why we handle our claims in-house rather than via a third-party provider. Our direct-handled approach ensures continuity, clarity and efficiency which are all critical components in managing claims in a volatile and uncertain environment.

Target Industrial Classes

Semiconductor
Fabrication Plants

Distribution Centers

Equipment
Manufacturing Plants

Food/Beverage
Processing Plants

Why Berkley Construction Solutions?

Whether you're building a distribution center, or chemical processing plant, having tailored coverage ensures that your business can thrive in the dynamic and challenging landscape of energy construction.
